Education

National University of Singapore	[Expected 2020]

Bachelor of Computing (Honours) in Computer Science
CAP: 4.35/5.00 (Currently in Year 2 Semester 2)
Relevant Coursework: Data Structures & Algorithms, Database Systems, Intro to Software Engineering, Intro to Artificial Intelligence, Interaction Design

Singapore Polytechnic	[2010 – 2013]

Diploma with Merit in Business Administration
GPA: 3.83/4.00

Projects

iungo – Java Desktop Application	Portfolio GitHub

A software engineering project for CS2103.

– Desktop address book application controlled using a command line-like interface, with GUI by JavaFX.
– It is written in **Java** and has about 10kLoC. Contributions to this project can be perused following the portfolio link.

Taskrr – Full Stack Web Application	GitHub

A task matching web project for CS2102.

– Supports account creation and authentication.
– There are also queries to do various tasks such as bidding, creating new tasks, or viewing of offers.
– It is written in **JavaScript** using **Node.js** and **Express**. The backend database used is **Postgresql**.

Chope God – iOS Application	GitHub

Hackathon submission – Hack & Roll 2018

– A prototype app hacked together in 24 hours to use Apple's ARKit (augmented reality) to help reserve seats at a meeting room or table by marking the spot with a pin.
– The language used was **Swift** and **Firebase** was used as the backend database to store the locations.

Experience

Teaching Assistant – *National University of Singapore*	[Jan 2018 - May 2018]

TA for CS2103 Introduction to Software Engineering

– Facilitate discussions on OO system analysis, modeling and design, implementation, testing, and various software engineering principles.

Achievements

Won Top 8 in Hack & Roll 2018 for Chope God (project described above)

Skills & Abilities

Languages: Java, C, Swift, SQL, HTML/CSS
Technologies: Node.js, Express, Git, Postgresql
Misc: Fluent in English, Conversational in Mandarin
